

delivering the advantages of offshore PCB production

Flatfield is a leader in managing the offshore manufacture and logistics of printed circuit boards. Our international operations allow us to offer a comprehensive range of services, including design consultation, sourcing, manufacturing, field services and logistics.

Capabilities

- Single to double sided PCBs up to 24-multilayer boards with track and gap down to 50um line and space
- Boards sizes up to 540mm X 600mm (if you require boards larger then please discuss with our applications team)
- HDI stacked micro-via design up to 5 levels
- Flex and flex rigid, with micro-via, HDI flex rigid
- Non standard materials with controlling CTE, high TG, halogen and micro-wave along with aluminum substrates
- Full applications support team able to perform on site meetings if required

Fax: +852 3165 1253

We have built longstanding relationships with numerous production partners. This assures that clients can benefit from a wide range of qualified, world class suppliers and manufacturers. Our field offices allow us efficient, local access to their production facilities and engineers.

Online Tracking

Flatfield's online tracking application is a useful tool that allows our customers to follow each stage of the production of their PCB orders. The system not only clarifies communications, but allows us to improve service, measure performance and provide greater accountability throughout our operations
